Diversity and Function of Aerobic Culturable Bacteria in the Intestine of Sea Cucumbers

December 2012

Graduate School of Science and Technology
Nagasaki University

Xiaochi Zhang
CONTENTS

CHAPTER I Introduction ................................................................. 1

CHAPTER II Diversity and function of aerobic culturable bacteria in the intestine of the sea cucumber Holothuria leucospilota ........................................ 7
2.1 Introduction ........................................................................... 8
2.2 Materials and Methods ......................................................... 9
2.3 Results ................................................................................. 13
2.4 Discussion ........................................................................... 18
2.5 Summary .............................................................................. 20

CHAPTER III Physiological characterization of aerobic culturable bacteria in the intestine of the sea cucumber Apostichopus japonicus ...... 33
3.1 Introduction ........................................................................... 34
3.2 Materials and Methods ......................................................... 35
3.3 Results ................................................................................. 40
3.4 Discussion ........................................................................... 45
3.5 Summary .............................................................................. 48

CHAPTER IV Diversity and function of aerobic culturable bacteria in the intestine of deep-sea holothurian ........................................... 59
